Total Revenue by hour_bin

Total Transactions by hour_bin

Total Revenue by day_name

- Morning generates the most revenue — not because customers spend more per visit, but because far more transactions happen then (85,865 vs just 4,594 in early morning). Per-transaction spending is statistically consistent throughout the day

- Holiday sales are statistically slightly lower than non-holiday sales (avg. \$4.54 vs \$4.69), but the difference is minor and not a meaningful revenue driver.

- Revenue is steady across all seven days — no significant weekday vs. weekend difference (confirmed via hypothesis testing, $p = 0.53$). This is not a weekend-driven business.

Total Revenue by store_location

Total Transactions by store_location

store_location	Total Revenue	Total Transactions	Avg Items Per Transaction
Astoria	\$2,32,243.91	50599	1.40
Hell's Kitchen	\$2,36,511.17	50735	1.41
Lower Manhattan	\$2,30,057.25	47782	1.50

- Size (Small/Regular/Large) only applies to Coffee, Tea, and Drinking Chocolate — other categories like Bakery and Coffee Beans are sold without size variants.
- Product mix is broadly consistent across stores, with a slight lean toward Bakery and flavours at Lower Manhattan — consistent with its larger basket-size pattern
